1921 Price List of

McCartney's

Hardy Ozark Grown

Small Fruit Plants
Seed Sweet Potatoes

GOOD PLANTS
TRUE TO NAME
Reasonable Prices

E. W. McCartney
Neosho, Missouri
AST year was the first time I ever had my picture published. Do you blame me? Well, it did take some nerve, but don't judge our plants by my looks. You won't, will you? One fellow wrote me a long letter and wound up by asking me if I was Scotch-Irish. Well, he sent several nice orders, and I got a letter from him the other day, and this time he wants Sweet Potato Seed. I'll risk it again anyway, just for luck.

Somebody wanted to know what was the best thing they ever saw on strawberries. Sugar and cream, came a prompt reply. If the question should be asked where to go to find the best quality of strawberry plants, McCartney's, Neosho, Missouri, would be as correct. Our plants are second to none. Our years of experience in the heart of the Ozarks, the natural home of the strawberry, verifies our statement. You could not possibly secure better plants anywhere at any price. We have a goodly number of different varieties to select from, all true to name, fresh dug when shipped, and at prices that are right.

The fruit juice industry is just beginning. The time is here when large acreages of strawberries, grapes and other small fruits will be set out to supply the fruit juice demand that is growing larger every day. The grape grower of today is facing a new and profitable area. There never was such a demand for grape vines, and a vineyard is a lasting and profitable investment. Once set and well cared for, a vineyard lasts for many years. We have specialized on Strawberry plants,
Grape Vines and Seed Sweet Potatoes for years, and have hundreds of satisfied customers.

¶ We wish we might say Howdy to all our old customers, who cheer us with their friendly letters, and every year since they know us, send us their orders for anything we have that they might need. Each year we make new friends, and in our years of dealing with the public, we have done everything possible to have our goods please.

¶ If we please you, tell others. If we do not please you, tell us why.

¶ Yours for a square deal and the best of everything in our line. E. W. McCARTNEY.

†

INSTRUCTIONS.

ORDER EARLY and have plants reserved for future delivery. Late customers are frequently disappointed in finding some varieties are sold out. Dormant plants stand shipping much better than after growth has started. Early setting means a good stand. If plants arrive before you can set them, heel them in.

Give us your order for sweet potato seed early and they will be shipped at your option.

Try to have your hot-bed ready for seed sweet potatoes when they come, and bed them at once.

We are located on three railroads, so can ship any direction at any time.

Packing is done in the most thorough manner, and we make no charges for boxing, barrels or delivering to station.

We label everything we send out, with best quality of printed or written labels or tags.

SUBSTITUTION.—We never substitute unless authorized to do so, but suggest to our customers that when ordering they instruct us to substitute to the best of our judgment in case any varieties ordered are sold out.

OUR GUARANTEE.—We warrant all plants true to name, and first-class in every respect, with the express understanding and agreement that, should any prove not true to name, on proper proof, we will refund the money paid or will gladly replace any plants untrue to name, but are not liable to damage other than herein named.

We do not guarantee sweet potatoes as to condition upon arrival, as we have no control over transportation service. But if order is unusually delayed and arrives in poor condition, ask agent for Bad Order Receipt. We will be glad to be of any service in placing damage claim before proper authorities, and will do our utmost to put claim through.

WE DO GUARANTEE seed and plants to leave our hands in best possible condition and packed in proper manner, and if not unnecessarily delayed should arrive in first-class condition.

TO THE NEW CUSTOMER.—Would say if in doubt as to our reliability, please read the few testimonies we have reproduced here. We think
they are far better recommendation and far better proof, as to the reliability of our stock than all we can say. They are genuine, and we want to thank the writers of these nice letters and assure them we will do everything in our power to maintain their confidence.

Fifty plants at 100 rates; 500 plants of one variety at 1000 rates.

Strawberry plants weigh about 20 to 25 pounds per 1000.

Grapevines—1-year No. 1, about 150 pounds per 1000 packed.

PARCEL POST.—For small orders, parcel post will be most satisfactory. Ask your postman for rates. Seventy pounds may be sent by parcel post in zones one, two and three, and fifty pounds in all other zones.

EXPRESS SHIPMENT is the safest way to ship live plants. For small orders use parcel post. For grapevines and bush fruits, freight shipments will be satisfactory. Sweet potatoes should come by express or parcel post.

CLAIMS, if any, must be brought to our attention immediately after receipt of plants, for correction.

If your order reaches you in bad condition, whether our fault or the fault of the fellow, write us at once. Perhaps we can adjust the matter to your satisfaction. Of course you will file claim at once with the transportation company, if it appears to be their mistake. We want every order to be satisfactory and will spare no pains to make it such.

INSPECTION.—Our plants and sweet potato seed are inspected every season by the State Inspector and a copy of inspection will accompany every shipment. Plants are all clean and healthy.

REFERENCE.—First National Bank, Neosho, Mo.; Newton County Bank, Neosho, Mo.

CORRESPONDENCE.—Any information will be cheerfully given, on request, in regard to description, soil, varieties, express and freight rates and small fruit culture in general.

TERMS OF PAYMENT.—Cash, postoffice money-order, or express money order. Or will book orders for one-half the full amount, balance to be sent when order is shipped.

*Strawberries

STRAWBERRY PLANTS.

We have a large supply of strawberry plants for spring delivery. The season has been ideal, an abundance of rain and very late full growth; plants have made extra heavy crowns with long yellow roots, the kind that stand shipment and transplanting perfectly.

The high price of strawberries for the last few years has created an unusual demand and unless ordered early some are going to be disappointed in securing enough plants for their acreage.

OZARK GROWN PLANTS.—It's an acknowledged fact that our climate conditions and alti-
tude, with our gravelly soil, produce the hardest plants in the country, also our open winters and early springs give us the advantage of shipping from middle of February till last of April. When northern plants are frozen in the ground ours are ready to go. You won't have to wait for our plants. On the other hand, you can order them out early and set out at once or heel out for future use.

Order your berry plants early and set them early; here in the Ozarks some time in March. We have found that early setting carefully done, clean and thorough cultivation through the growing season, will make a profitable strawberry bed, very near every year if first-class, new plants are used. There is no great secret about a berry patch; the main thing is persistent "stickatitive-ness." The more you plow and hoe the more they grow, the harder you work the harder they grow, the more attentive you are, the more productive they are. They come nearer responding to every touch bestowed on them than any crop we know of.

With our limited space we are not going into details of strawberry culture. As we grow them here at Neosho, a fruiting bed or field lasts four years, producing three crops of fruit. The first year the cost is considerable. The second and third seasons fruiting beds are very easily taken care of and with very little expense. McCartney's plants are taken from a new bed that is grown especially for plants, never from an old bed, true to name, are healthy, hardy and productive. We dig them fresh for every order; are tied in bunches of 26 (counted 25) and each variety labeled; plants dug today are usually on their way by tomorrow.

Varieties marked "Per." are perfect flowering, and those marked "Imp." are imperfect flowering, and for the best results should have two rows of some perfect flowering variety planted every fourth or fifth row.

**AROMA (Per.)—Medium Late.**

Plants very vigorous and perfectly healthy; makes lot of plants; fruit large to very large; of perfect form and excellent quality, a long season and very prolific. Will make a row where others fail. More of this variety grown in the Ozarks than all others combined. We specialize on this variety and can furnish you the very best grade of plants. 90c per 100, $5.00 per 1000.

**EVENING STAR (Per.)—Late.**

A good late berry. Plants healthy, thrifty; fruit large; very similar to the Gandy. If you are looking for a late berry this will please you. $1.00 per 100, $8.00 per 1000.

**KLONDIKE (Per.)—Mid-Season.**

Fruit large, round, dark glossy red. Plants medium size, very productive. Grown extensively in the South and succeeds in the North. $1.00 per 100, $6.00 per 1000.

**SENIOR DUNLAP (Per.)—Mid-Season.**

A general favorite in the North. A good plant—
maker, perfectly healthy, long rooted. Good drouth resister, very productive, fruit dark red and very attractive. $1.00 per 100, $6.00 per 1000.

GANDY (Per.)—Very Late.
One of the best of the old varieties for canning and long shipments. Fruit very large, plants healthy. Does better planted with some other late variety. An old stand-by. $1.00 per 100, $6.00 per 1000.

WARFIELD (Imp.)—Medium Early.
An old standard variety. It succeeds almost everywhere. As this is a good plant-maker, it and Dunlap make a good team. 80c per 100, $4.00 per 1000.

ST. LOUIS (Per.)—Early.
Berry a little soft for long shipment, but has many good points and will not disappoint you. Fruit very large and very productive for an early berry. The best early berry for home use. $1.00 per 100, $5.50 per 1000.

CHAMPION K.
A very promising new variety. The originator describes it as very early. A heavy cropper, fruit large, for an early variety. Plants strong grower. Better try these. Have a very limited supply of these at $1.50 per 100.

EARLY OZARK (Per.)
This is a good all-round early berry, ripens about with the St. Louis but fruit is much firmer. Plants large and thrifty. Like all Ozark plants, this is a winner. $1.25 per 100.

MITCHEL'S EARLY (Per.)
One of the earliest and sweetest, an old stand-by. Plant growth extra strong, fruit medium size. 80c per 100, $4.00 per 1000.

TEXAS (Per.)
One of the first to ripen. Berry large and a fair plant-maker. Should be grown on strong soil. $1.00 per 100, $6.00 per 1000.

UNCLE JIM (Per.)
Mid-season to late. Plants vigorous and healthy. A good plant maker. A producer of fine berries. $1.00 per 100, $6.00 per 1000.

CARDINAL (Imp.)
This variety takes its name from its rich cardinal color. Fruit large and roundish. Use Aroma for fertilizer. $1.00 per 100, $6.00 per 1000.

BRANDYWINE (Per.)
In some localities this good old variety is largely planted. One of the best in its class. Foliage healthy and a strong grower. Fruit large and of perfect form. $1.00 per 100, $6.00 per 1000.

HELEN DAVIS (Per.)
Plants are strong, making many runners. A new variety, highly praised for its fruitfulness. $1.25 per 100, $7.00 per 1000.

BUBACH (Imp.)—Mid-Season.
This is a general favorite. Well tried. Old, but one of the best. Fruit large, of fine quality for table use. Aroma will give good results as a fertilizer. $1.25 per 100, $7.00 per 1000.
EVERBEARING STRAWBERRIES.

PROGRESSIVE (Per.)
A good plant-maker and, as name indicates, is one of most up-to-date and popular of the ever-bearing varieties of strawberries. $2.00 per 100, $12.00 per 1000.

PEERLESS.
A new everbearing. Resembles Superb some. A good one for home use and market. Berries large with delicious flavor. 50 cents per dozen, 90 cents for 25, $3.50 per 100.

Grapes

Some fruit growers say if you plant only one kind of fruit, let that be grapes. Grapes, with a little care, produce abundantly a delicious fruit when other fruits are scarce. Grapes are found growing wild almost all over the United States. Rocky hillsides, upon which no other fruit would thrive, will produce wonderful crops of grapes.

Grapes can be confined to stakes, trained to trellises, or grown on arbors, over buildings and under all conditions will yield its delicious fruits. As a commercial crop, from $100 to $300 per acre can be made from grapes.

CULTURE.—Plow ground deep; if possible sub-soil. With turning plow lay off rows both ways and set plants in cross. Most varieties should be set 8x10 feet. After trimming roots of plants back to about four or five inches, and top to two or three buds, set about two inches deeper than grown in nurseries, firm soil well around the roots, give clean cultivation with plow or vineyard disc. The first season's care often determines the future usefulness of the vineyard. The first season allow just one bud or shoot to grow, rubbing off all surplus when small. First pruning after planting, prune to two buds. Second summer's cultivation should be about the same as first. Begin spring cultivation with a one-horse turning plow. Never plow deep enough to disturb the roots. Throw the soil from the row and if trellised, the strip left unplowed in row should be hoed, after which they should be plowed again, throwing the soil to the row. Give clean cultivation the whole season.

Pruning from this time on depends upon training method adopted, of which there are many. Some favor one, some another, but the training and pruning is the most important work in the vineyard, and requires some skill and judgment. For want of space we are not going to underrate to describe the many pruning systems in use. The amateur vineyardist should seek the help of an experienced pruner, or write the Agricultural Department, Washington, D. C., for bulletin on this subject.

A WORD ABOUT McCARTNEY'S GRAPE VINES.—Our cuttings are taken from our own bearing vineyard. We use only the best grade of canes from prolific vines for our cuttings, and
can assure you they are true to name, free of disease, plants carefully dug and sorted or graded, and all weak or inferior vines taken out.

We use care in growing our vines. We use care in packing our vines, because we want you to succeed with them, for your success is our success. If they please you, tell your neighbor; if they don't suit you, tell us. We want you to be satisfied. Some of our best customers are people who have ordered from us for several years. We not only grow plants to sell, but grow them to produce fruit, and that is your object in buying and caring for fruit plants—FRUIT.

MOORE'S EARLY.—Black.
Bunch medium, berry large, with blue bloom. Quality fair. When fully ripe one of the best. Vine a moderate grower, very healthy and hardy. Fruit least susceptible to rot of any variety listed. The most popular and productive commercial grape of the early varieties. Ripens about two or three weeks ahead of Concord. For large orders of this variety, ask for wholesale prices. 1-year No. 1—20c each, $10.00 per 100. 2-year No. 1—30c each, $15.00 per 100.

WORDEN.—Black.
Possess most of the good qualities of the Concord and lack some of the bad ones. Better in quality and a few days earlier. Inclined to crack when fully ripe. 20c each, $12.00 per 100.

CONCORD.—Black.
Bunch, large, compact. A good shipper. Berry medium. A very productive mid-season grape. With us bunches do not ripen evenly. The most widely planted grape in America. The heaviest and surest cropper in the Central West. 1-year No. 1—20c each, $10.00 per 100. 2-year No. 1—30c each, $15.00 per 100.

EATON.—Black.
Foliage very similar to Concord, vines healthy and hardy. Bunch and berry very large. Skin thin, but tough, pulp tender. Ripens with Concord. A very showy grape. 1-year No. 1—25c each, $20.00 per 100.

NIAGARA.—White.
Succeeds everywhere. Bunch very large and handsome, often shouldered. Berries large, round, skin thin and tough. Does not crack and is a good shipper. Has not much pulp when fully ripe. Sweet, melting, with a flavor and aroma of its own. The most popular of the white grapes. 1-year No. 1—20c each, $15.00 per 100.

GREEN'S EARLY.—White.
Bunch small to medium. Berries small, juicy, and very sweet; excellent quality. Vine medium and very hardy. Ripens just before Moore's Early. 1-year No. 1—30c each, $25.00 per 100.

Blackberries

EARLY HARVEST.
With us this is the standard variety, being very early, hardy and a good cropper—a sure money-
The berry for the Ozarks. $3.00 per 100, $20.00 per 1000.

**SNYDER.**

The most widely planted of all blackberries, an old and well tried variety. $3.50 per 100, $25.00 per 1000.

**McDONALD.**

A variety of Southern origin and is peculiar in having an imperfect bloom and must be set with some other variety, such as Lucretia Dewberries or Early Harvest Blackberries to pollinate. Winter kills some seasons, but if it could be protected it bears the largest berries we ever saw. We have grown them very nearly two inches long. $4.00 per 100, $25.00 per 1000.

**BLOWERS.—Late.**

With us this one is more hardy than some. Cane a rank grower, should be carefully headed back. Ripens with Snyder. Fruit medium size. Some seasons very productive. In some localities this variety is highly recommended. $4.50 per 100.

**MERSEREAU.**

Berry large, of fine quality. With us not as hardy or productive as Early Harvest. Mersereau is largely planted by some growers. It is surely a favorite as plants of this variety are in great demand. $4.50 per 100.

**RATHBUN.**

Berry large, jet black. Firm enough to ship well. Cane just medium in growth and hardiness. $3.00 per 100, $20.00 per 1000.

**LUCRETIA DEWBERRIES.**

Standard variety of dewberries and will succeed and do well on thin land. Requires less cultivation than blackberries and will yield heavy crops of fruit with utter neglect. Ripens a few days before blackberries. The most delicious berry in the blackberries. $3.00 per 100, $18.00 per 1000.

**Raspberries**

**KANSAS** (black)—$5.00 per 100, $35.00 per 1000.

**CUMBERLAND** (black)—$5.00 per 100, $35.00 per 1000.

**CARDINAL** (purple)—$5.00 per 100, $35.00 per 1000.

**COLUMBIAN** (purple)—$5.00 per 100, $40.00 per 1000.

**CUTHBERT** (red)—$4.50 per 100, $35.00 per 1000.

**ST. REGIS** (Everbearing Red)—$5.50 per 100, $45.00 per 1000.

**Gooseberries**

2 Years Old.

**HOUGHTON**—30c each, $2.50 per 10.

**DOWNING**—30c each, $2.50 per 10.

**Asparagus**

2 Years Old.

**PALMETTO**—10 for 80c, $3.00 per 100.
IN REGARD TO 1921 PRICES

In this price list we are quoting you rock bottom prices on plants and seed. We are not spending a lot on high-colored pictures and printer's ink, but our plants produce fruit with the high color and come a whole lot cheaper. We have cut the price from 20 to 50% over last year, and yet maintained the quality and improved it on some. On large orders to associations and big buyers we can even make a lower price on some varieties. Write your wants and let us figure with you.

Shrubbery

Don't neglect to have a few flowering shrubbery in your order, for the women folks to fuss with. A rose hedge is a joy forever, as once set they last for years. Lilacs, Snowballs and Hydrangeas along the flower beds for a background. You never saw a woman who did not love flowers. If you have no flowers, get busy. Plant as many kinds as you can get hold of. You can't have a grrouch very long if you have a well kept flower garden around, no more than you can have with a roolly-polly, hearty, healthy kiddie around. Flowers and babies go together. Plant flowers for Mother and the Babes.

Sweet Potatoes

We make a specialty of Seed Sweet Potatoes, and can supply you with strictly first-class stock. Our years of experience in the sweet potato business enables us to know just how to pack them for shipment. We use special care in packing seed and guarantee they are delivered to our station in good condition.

We ship in bushel boxes or barrels, lining boxes or barrels with paper when necessary. We will deliver potatoes up till April 20, but would advise having your seed reserved for future shipment as our supply is usually exhausted before that date. Use ordinary hot-beds for planting seed, being careful not to bed seed until heat runs below 70 or 80. We bed about three bushels per acre. Requires about a month to grow plants. All prices on Sweet Potato Seed are F. O. B. Neosho. No extra charge for packing, purchaser paying carrier charge.

We use all care possible in handling and packing and ship long distances with success, but, ow-
ing to the perishable nature of Sweet Potatoes, we do not guarantee safe arrival.

Our Sweet Potato Seed is kiln dried, dug when in the prime of condition, graded and sorted in the field. From the time they are plowed out (we do not use a digger as it bruises the pota-
toes), hauled to the kiln, taken through the cur-
ing process, given just the right amount of heat through the long winter, sorted and packed for your order, they are handled and treated in a scientific manner. They are sure free of disease, first because the seed is dipped before bedding for any chance disease, second because they are inspected by the State Entomologist each season, third because they are sorted and handled by ex-
erts.

Did you ever figure out what an acre of sweet potatoes would yield? Takes about 10,000 to 12,000 plants per acre. Now look at some of our testimonies. Thirty-five bushels of potatoes from 1000 plants. Figure on this. Can you a-
ford to miss planting sweet potatoes? At the prices they are selling at, they are mortgage lifters.

Sweet potatoes under twelve pounds, pound rates. Over twelve pounds, bushel rates. A bushel of potatoes weighs about 50 pounds, pack-
ed. A barrel about 160 pounds, packed.

GENUINE YELLOW YAM.
Skin pale yellow, flesh yellow, cooking soft and juicy. Fine for baking. Potato spindle in shape, sometimes round but usually of good shape. A very attractive potato. Vines short and some-
times of bunch habit. A good cropper, often mak-
ing high yields. Per pound 10c, bushel $2.00, barrel $5.80.

SOUTHERN QUEEN.
A standard early variety (white), a good yield-
ing potato and under favorable conditions one of the heaviest yielders. Should be grown on fertile ground. Potatoes are large, thick and blunt at ends, or of short, spindle shape. Flesh white. A good keeper for a large potato. Vines make a moderate growth. A shy plant-maker, and should bed more seed per acre. Per pound 10c, bushel $2.25, barrel $6.50.

GOLDEN QUEEN.
One of the earliest and heaviest croppers. Roots large and often round and irregular in shape. Skin creamy yellow, flesh white. Vines make a rank growth and resemble Red Bermuda. Can be dug quite early and make marketable potatoes. Potatoes produce many slips. Per pound 10c, bushel $2.25, barrel $6.50.

RED BERMUDA.
A very heavy yielder and very early. A great favorite with gardeners on account of earliness. Skin dark red, flesh white, quality just fair. Vines very rank and heavy. A poor winter keep-
er. An extra good plant-maker. Per pound 10c, bushel $2.25, barrel $6.50.

PUMPKIN YAM.
Skin light yellow, flesh deep yellow, frequently
pumpkin color. Cooks soft, a good table variety if you care for a soft sweet potato. Vines make a moderate growth. Looks like a cross of the Jersey and Yellow Yam. Potatoes spindle in shape and sometimes ribbed. Per pound 10c, bushel $2.25, barrel $6.50.

YELLOW JERSEY.
The most widely planted variety we know of, but seems to be in greater favor in the North, as most of our Northern orders call for this variety. Yellow skin, flesh white, dry and mealy. Potato smooth, spindle shape. Grows very compact in hill; with us not a heavy cropper. Vines strong and healthy, a good keeper if handled carefully. Potato just a medium plant maker. Per pound 10c, bushel $2.00, barrel $5.80.

YELLOW NANSEMOND.
About same as Yellow Jersey. Per pound 10c, bushel $2.00, barrel $5.80.

RED JERSEY.
With the exception of color very much like the Yellow Jersey. Quality, shape and vine growth about the same. Color red, slightly more productive. Keeping qualities about the same as Yellow Jersey. Per pound 10c, bushel $2.25, barrel $6.50.

RED NANSEMOND.
Very similar to the Red Jersey. A mighty fine looking potato if you like the color. Per pound 10c, bushel $2.25, barrel $6.50.

NANCY HALL.
Similar in growth and habit to the Yellow Yam, making very light vine growth. Skin creamy yellow, flesh yellow; when cooked, soft, sweet and juicy. Very attractive, one that most everyone likes. Roots are spindle shape grows close in hill, and considering the quality a heavy cropper. Probably the most popular variety on the market today. Potatoes are a medium plant-maker and requires a few more seed per acre. Per pound 10c, bushel $2.00, barrel $5.80.

PORTO RICO.
Skin pinkish red and smooth. Not a bad color. Flesh yellow and of fine quality, cooking soft and juicy. One of the best table varieties. Potato medium long, cylinder type to spindle shape.
Vines healthy, heavier growth than Nancy Hall or Yam, and favors those varieties some, except foliage is somewhat darker. A moderate plant grower a heavy cropper; and while this is a new variety it will surely please you and when better known will be in great demand. Per pound 12c, bushel $2.50, barrel $7.00.

**EARLY TRIUMPH.**

A new extra early variety, skin yellowish white, flesh yellowish white. Potato cylindrical (sometimes long, but grows large and for early market they are winners. The most attractive early potato we know of. Vines slender and long, split leaf or forked. Foliage dark, potato spread out in the hill. A medium to poor plant maker. If you are looking for an extra early variety try these. Per pound 12c, bushel $2.50, barrel $7.00.

**Sweet Potato Plants**

We will have sweet potato plants of the varieties listed about April 1.

All prices quoted are by express or freight, not prepaid. If you order by parcel post be sure to include postage. Excess postage will be returned.

Our plants are grown from especially selected seed, that is treated before planting or bedding, for black rot, stem rot, and other dangerous diseases; are well rooted and will average about six inches in length.

They are packed for long distance shipments, roots packed in damp moss. They come tied in bunches of 100, each variety labeled. Plants weigh, packed for shipment, about 15 to 20 pounds per 1000. They should always be shipped by express or parcel post. If to be sent by parcel post always send postage with order. Postage about 8c per 100. For larger quantities, ask your postman for rates.

McCartney’s plants out-yield and produce more sweet potatoes and sweeter sweet potatoes because we grow, grade and select the very best grade of seed sweet potatoes. They are the better kind.

Please give us your order just as early as possible, and for orders received before March we give a special discount.
In 5,000 to 10,000 lots 5 per cent discount. In orders over 10,000 a 10 per cent discount.

**TRANSPLANTED TOMATOES.**

We plant the very best grade of tomato and cabbage seed, and our plants are heavy producers. Be sure and have some of these in your next order. If you wish an extra early garden, of course you will need extra early plants. Our transplanted plants will please you and make you money. You can have tomatoes a month earlier by planting our transplanted plants.

**UNIVERSITY OF MISSOURI No. 80 AGRICULTURAL EXPERIMENT STATION Columbia, Missouri, January 14, 1921 Certificate of Nursery Inspection**

This is to certify, That in accordance with the Nursery Inspection Act, enacted by the Forty-seventh General Assembly and approved March 27, 1913, the nursery stock of the E. W. McCartney Nursery, grown at Neosho, Newton County, Missouri, was inspected July 20, 1920, by a duly authorized inspector and found apparently free from dangerously injurious insects or plant diseases. Valid until July 1, 1921, unless sooner revoked.

L. HASEMAN,
Entomologist and Chief Inspector.
A VIEW OF OUR SWEET POTATO FIELD.

TESTIMONIES.

E. W. McCartney, Dear Sir—Your price list on vines and shrubbery at hand. I will need strawberry plants and grape vines and possibly some other berry plants as I am a dealer. You gave me a square deal last year and I am going to continue my orders with you.—H. R., Fordyce, Nebr.

Tomato plants arrived in good condition.—G. M., Calamus, Iowa.

Received my strawberry plants today in fine condition and they are fine plants. Thank you so much for your prompt shipment.—W. E. D., Lamar, Mo.—A satisfied customer.

Sweet potato plants arrived May 14th in good condition and are strong, healthy plants.—C. C., Charter Oak, Iowa.

The potatoes came in fine shape. Also the 100 strawberry plants came in fine condition and were as fine as I ever saw. You sent me some extra St. Louis plants. They are new to me and if you think them good send me 25 and the balance in Aroma plants. Inclosed is $1.25.—R. C. M., Eldorado, Kans.

All the plants are doing just fine. All the grapes are living, also the rose bush and the gooseberry bushes.—A. L., Wilmore, Kans.

Received the strawberry plants in fine condition and I am well pleased. Thank you for your prompt attention.—Mrs. M. E. C., Granby, Mo.

Received sweet potatoes in fine shape, also the grape vines. They are nice plants.—B. D., Kildare, Okla.

While visiting friends of mine in Joplin, I was shown some of the Superb Everlasting Strawberries, the plants of which were gotten from you. Now I have some everlasting plants, but they are not giving results in comparison with those just mentioned, and I wish to have your catalog describing your different kinds of strawberries, prices, etc.—G. W. M., Miami, Okla.
